

# General Aviation Manufacturers Association

# 2025 Hill Day

**GENERAL AVIATION ADVANCES  
SAFETY AND INNOVATION &  
FACILITATES ECONOMIC  
DEVELOPMENT**

## Importance of General Aviation

General aviation supports \$339 billion in total economic output and 1.3 million total jobs in the United States.

General aviation is at the forefront of aviation's future – prioritizing safety, championing innovation, connecting communities, and stimulating economic growth. Our progress propels the benefits of aviation on a global scale.

General aviation manufacturing supports highly skilled, good-paying jobs in an industry that supports aerial firefighting, medical airlift, natural disaster response, law enforcement, agriculture protection, business connectivity and much more.

## Key Priorities

GAMA and its member companies are advocating for Congressional support on the following critical issues:

- Maintaining treatment of civil aviation goods under the Agreement on Trade in Civil Aircraft
- Strengthening and Modernizing the air traffic control system
- Implementing 2024 FAA Reauthorization provisions that facilitate a skilled aviation workforce, innovation, and U.S. leadership
- Ensuring robust funding for FAA's Aircraft Certification Service (AIR) office
- Supporting tax incentives that spur innovation and aviation manufacturing jobs
